

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

**Amendments to the Claims:**

Please amend claims 5, 14 and 16, and add new claim 18 as follows. The following listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claims 1-4 (Cancelled).

Claim 5 (Currently Amended). An electronic camera comprising:

processing means for compression processing an image obtained by sensing;

5 recording means for recording the processed image as an image file; and

transmission means for transmitting the image file recorded in said recording means upon receiving base station identification information of a master unit in position

10 registration processing according to movement, the master unit having registered a self device as a subsidiary unit,

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

wherein the transmission means transmits only an image  
unrecorded in a recording apparatus of the master unit to the  
master unit and the image file is recorded in the recording  
15 apparatus of the master unit upon being transmitted to the master  
unit by said transmission means.

Claim 6 (Original). A camera according to claim 5, further  
comprising means for, when the image file is recorded in said  
recording apparatus, automatically erasing the transmitted image  
file from the self device.

Claim 7 (Cancelled).

Claim 8 (Original). An electronic camera comprising:  
recording means for recording an image obtained by sensing  
as an image file;

means for determining whether a base station capable of  
5 communication at the highest level is a master unit in which a  
self device is registered as a subsidiary unit;

means for, when it is determined that the base station is  
the master unit in which the self device is registered as the  
subsidiary unit, transmitting a file name of the image file

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

10 recorded in said recording means to the master unit and receiving  
a file name of an untransmitted image file from the master unit;  
and

means for transmitting an image file corresponding to the  
received file name of the untransmitted image file to the master  
15 unit.

Claim 9 (Original). A camera according to claim 8, further  
comprising

means for disconnecting communication with the master unit  
after the image file corresponding to the file name of the  
5 untransmitted image file is transmitted to the master unit.

Claim 10 (Original). An electronic camera system comprising:

an electronic camera; and

a personal handy phone unit attached to said electronic  
camera,

5 wherein said electronic camera comprises  
image sensing means for sensing a target sensing object,  
a memory card for recording an image of the target sensing  
object sensed by said image sensing means as an image file, and

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

10 a control section for transmitting a file name of the image  
file recorded on said memory card to said personal handy phone  
unit, searching said memory card for an image file corresponding  
to a file name of an untransmitted image file, the file name  
being transmitted from said personal handy phone unit, and  
transmitting the image file found by the search to said personal  
15 handy phone unit, and

said personal handy phone unit transmits a file name of the  
image file recorded on said memory card and sent from said  
control section to a master unit in which a self device is  
registered as a subsidiary unit, receives a file name of an  
20 untransmitted image file from the master unit, transmits an image  
file corresponding to the received file name of the untransmitted  
image file to said control section, and transmits the image file  
found by the search transmitted from said control section to the  
master unit.

Claims 11-13 (Cancelled).

Claim 14 (Currently Amended). An electronic camera system  
comprising:

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

an electronic camera having a unique identification code and  
capable of transferring image sensing data stored in nonvolatile  
5 storage means to a predetermined partner by data communication  
compatible to a personal ~~handyphone~~ handy phone system (PHS),  
said electronic camera storing the image sensing data in said  
nonvolatile storage means; and

a base station unit of the personal handy phone system (PHS)  
10 which has a unique identification code and a predetermined  
storage unit and is capable of data communication compatible to  
said personal ~~handyphone~~ handy phone system, and which performs  
data communication with said electronic camera and stores the  
transferred image sensing data in said predetermined storage  
15 unit.

Claim 15 (Original). A system according to claim 14, wherein  
said electronic camera is set as a subsidiary unit having said  
base station unit as a master unit and transfers the image  
sensing data only when said master unit and said subsidiary unit  
5 can directly perform data communication.

Claim 16 (Currently Amended). An electronic camera capable  
of communication on a personal ~~handy phone~~ handy phone system  
(PHS), comprising:

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

an image processing unit configured to process image data  
5 obtained by an image of said camera;

a storage unit configured to store said image data as an  
image file by assigning a unique file name; and

a communication unit configured to communicate with a  
specified communication unit when said specified communication  
10 unit is found to establish mutual communication;

wherein said communication unit transmits said image file  
stored in said storage unit to said specified communication unit  
if ~~said image file~~ it is determined that ~~[[it]]~~ said image file  
is not previously sent to said specified communication unit.

Claim 17 (Previously Presented). The electronic camera  
according to claim 16, wherein the determination of said  
communication unit is carried out by mutual recognition of said  
file name in said storage and a storage connected to said  
5 specified communication unit.

Claim 18 (New). A system according to claim 14, wherein the  
electronic camera transfers only image sensing data which is  
unrecorded in the predetermined storage unit of the base station  
unit to the base station unit and the image sensing data is

Appln. No. 09/594,875  
Amendment dated June 23, 2005  
Reply to Office Action of March 28, 2005

- 5 recorded in the predetermined storage unit of the base station unit upon being transmitted by the electronic camera.
